FOR IMMEDIATE RELEASE
July 1, 2017

BRYAN BOILERS AND WEBER-HUFF, INC. NEW PARTNERSHIP

Central and Southern Ohio

Columbus, Ohio, July 1, 2017– It is with great pride that we announce that effective 7/1/17, Weber-Huff, Inc. is the new home of Bryan Boilers in Central and Southern Ohio!

Bryan Steam, originators of the “Flexible Water Tube” design since 1916, has been offering a line of boilers including forced draft gas, electric, condensing, Low NOx, and knockdown boilers in capacities from 6 to 600hp for industrial, commercial and institutional applications.

The “Flexible Water Tube” design provides fast, natural internal circulation for maximum heat transfer and operating efficiency. Bryan Steam also manufactures a complete line of deaerators, feed systems, related steam equipment & accessories, indirect water heaters and pool heaters.

Bryan and Thermal Solutions have partnered to design and develop one of the best new products in the condensing platform to date. The Thermal Solutions “Arctic” boiler has been very successful and this fall will be introduced in the 4,000mbh platform. Thermal Solutions efficiency (upwards of 96%) paired with Bryan’s reliability (a lifetime shockproof ‘Seal of Certainty’ warranty on stainless steel tubes) is a combination that is setting the standard in the HVAC Industry today.

Weber-Huff, Inc., a leading Manufacturer's Representative firm in the Hydronic / HVAC Industry, has been dedicated to the sales, marketing and product representation of leading manufacturers since 1970.
